Problem Solving

- Developed and maintained large scale web app with Angular 8, consuming REST API, using CSS preprocessing and Test and Debug tools like Jazmin.
- Coordinated and management of the development team to achieve set objectives following agile planning.

Side Projects

Finanzas Sanas

Lead Front-end Developer

2019

- We are developing a Web App that determinate the level of indebtedness of the user, then provides a personal plan to achieve your financial goals (like study or buy a house).
- We build an algorithm that allows to identify which users are in risk to fall into over indebtedness and we can help to avoid that. We can also guide the users that already are in that situation to keep forward and get out of their debts.
- We're aiming to validate our idea with real users, getting to know their needs in detail and iterate our initiative in order to develop a full experience that adapts to what people really needs.

All Inclusive

Front-end Developer

2018

- This app is an inclusive tourist guide for people with disabilities.
- We use our own database made on NodeJS with data provided by the government and the inclusive circuits association of Santiago.
- The application offers the guidance of a voice assistant for the blind and also the high contrast option for people with low vision.

Planting Friends

Front-end Developer

2018

- Development of a social network focused on caring for the environment.
- Developed in Angular v6 with authentication in firebase, database in firebase firestore and data hosting in firebase storage.
- The entire application is hosted on a single page which is updated as the user navigates through it, in this way the execution time is reduced and the entire flow runs almost instantaneously.
- The data is updated in real time, which makes it possible for users to connect and communicate spontaneously from anywhere.

Formal Education

LABORATORIA SCL

Technical Degree/Front-end Developer

2018

UNIVERSIDAD DE LAS AMERICAS

Bachelor's Degree/Digital Animator

2015

Online Education

Serverless Restful Api con NodeJS

Udemy October 2019

C#: Object oriented programming

Linkedin Learning November 2019

Python (essential and better programming)

Linkedin Learning April 2020

Some Workshops attended

Google #womenwill Public speaker *February 2020*

Girls in Tech (Chile) Hacking for humanity *January 2020*

Desafío Latam Introduction to Unity and C# *December 2019*

Globan BDD workshop *October 2019*

Thoughtworks Design Patterns *July 2019*

IBM RPA workshop *June 2019*

Thoughtworks Unit Testing *April 2019*

Microsoft NodeJS and Azure *April 2019*

Facebook Developers networking *March 2019*

Globant Global Diversity CFP Day *March 2019*
